EVOLUTION STARTS WITH?

1. Charles Darwin or change over time, is the process by which modern organisms have descended from ancient organisms.
2. A scientific Theory is a well-supported, testable explanation of phenomena that have occurred in the natural world.
3. Charles Darwin was an English naturalist who made numerous observations during his travels on the Beagle which led him to post a hypothesis about how life changes over time.
4. Fossil are the preserved remains of ancient organisms that provide evidence for how life has changed over time.
5. Geologists proposed that the Earth is shaped by geological forces over extremely long periods of time, and that the Earth is very old.
6. Malthus predicted that the human population would grow faster than the resources needed to sustain it.
7. Natural selection is the process by which organisms with traits that are better suited to their environment are more likely to survive and pass on their genes to their offspring.
8. Geologists explained that the geological processes seen happening on the Earth now have shaped Earth's geological features over long periods of time.
9. Charles Darwin published his own theory of evolution by natural selection about the same time as Charles Darwin.
