Source: See table 12.4. Scholar may not add up due to rounding. Note: Positive numbers indicate the value from which slaves were transported; negative numbers indicate missing data. When numbers are the same, they refer to the same movement of slaves. For example, 11,000 reported from the British to the French Caribbean between 1716 and 1750. All such cases reflect movements between Caribbean islands. Reports in British and Spanish colonial colonies appear without a corresponding positive number.
