#Jenny

Finally I get this ebook, thanks for all these I can get now!

#Rio

Cool! I'am really happy

#Markus Jensen

I did not think that this would work, my best friend showed me this website, and it does! I get my most wanted eBook

#Hun Tsu

wtf this great ebook for free?!

#Che Salsa

My friends are so mad that they do not know how I have all the high quality ebook which they do not!

#Diego Butler

so many fake sites. this is the first one which worked! Many thanks

CHAPTER 6 STUDY GUIDE FOR CONTENT MASTERY

The Periodic Table and Periodic Law

Section 6.1 Development of the Modern Periodic Table
In your textbook, read about the history of the periodic table's development.

Use each of the terms below just once to complete the passage.

| | | | |
|----------|--------------|------------------|----------|
| octaves | atomic mass | atomic number | nine |
| elements | properties | Henry Moseley | eight |
| protons | periodic law | Dmitri Mendeleev | accepted |

The table below was developed by John Newlands and is based on a relationship called the law of (1) _____. According to this law, the properties of the elements repeated every (2) _____ elements. Thus, for example, element two and element (3) _____ have similar properties. The law of octaves did not work for all the known elements and was not generally (4) _____.

| | | | | | | |
|---|----|----|----|----|---|---|
| 1 | 2 | 3 | 4 | 5 | 6 | 7 |
| H | Li | B | Be | C | N | O |
| F | Na | Mg | Al | Si | P | S |

The first periodic table is mostly credited to (5) _____. In his table, the elements were arranged according to increasing (6) _____. One important result of this table was that the existence and properties of undiscovered (7) _____ could be predicted.

The elements in the modern periodic table are arranged according to increasing (8) _____ as a result of the work of (9) _____. This arrangement is based on number of (10) _____ in the nucleus of an atom of the element. The modern form of the periodic table results in the (11) _____, which states that when elements are arranged according to increasing atomic number, there is a periodic repetition of their chemical and physical (12) _____.
